

## JA-251 Large Diaphragm Tube Condenser Microphone

With a circuit inspired by the classic AKG C12 and Telefunken ELA-M 251, the JA-251 is a multi-pattern tube condenser microphone with an exceptionally high quality 6 micron German style capsule optimized for the hand selected 6072a dual triode tube.

Custom designed utilising a true vacuum tube circuit, the JA-251 has been crafted using only the highest quality components then meticulously tuned and tested by hand. The JA-251 also boasts a superb BV11 transformer wound to the original Telefunken blueprints used in the famed Neumann microphones of the 60's.

The JA-251 is truly comparable to classic vintage tube microphones costing over ten times as much.

- 34mm 6µm Gold Sputtered Edge Fed German Style Capsule
- 9 patterns: Omni, Cardioid, Figure-Eight and 7 Stages
- <200 ohm Impedance
- 15hz to 20khz Frequency Response
- -17db(A weight) Noise
- .5% Distortion @ 125db
- Class 'A' 6072a Tube Circuit
- BV11 Transformer Output
- Premium Robust Shock-Mount
- 7 Pin XLR Cable
- Included Power Supply
- Deluxe Protective Wooden Box
- Aluminium Road Case
