

The JA-47F FET Large Diaphragm Condenser Microphone

With a circuit inspired by the legendary Neumann U-47 FET, the JA-47F sports two selectable patterns (Cardioid & Omni), a dual diaphragm 6 micron capsule, Class A amplifier design and a transformer delivering balanced output.

Our JA-47F microphones have been crafted using only the finest components then meticulously tuned and tested by hand. The JA-47F is the ideal choice for any application making it truly comparable to classic vintage microphones without the exaggerated price tag.

Whether recording vocals, kick drums or instruments; JA-47F is a clear cut above the rest.

- 32mm 6µm Gold Sputtered Centre Fed German Style Capsule
- Switchable Omni & Cardioid Patterns
- <200 ohm Impedance
- 25hz to 20khz Frequency Response
- -17db(A weight) Noise
- 48v Requirement
- -10db Pad Switch
- .5% Distortion @ 125db
- Class 'A' FET Circuit
- Transformer Output
- Standard Shock-Mount
- Protective Leather Bag
- Aluminium Road Case
