

## The JA-47T Large Diaphragm Tube Condenser Microphone

With a circuit taken from the same book as the unmistakable Neumann U-47T, the JA-47T is a multi-pattern tube condenser microphone with an accurately designed high quality 6 micron German style capsule coupled with a hand selected 6072a dual triode tube and custom transformer.

The JA-47T is custom designed utilising a true tube based circuit, crafted using only the highest quality components then meticulously tuned and tested by hand. A BV8 transformer wound to the same specifications as the original Neumann U-47T microphones completes the circuit ensuring a highly desirable output.

A tube microphone that will rival the all-time classics at a mere fraction of the cost.

- 35mm 6µm Gold Sputtered Centre Fed German Style Capsule
- 9 patterns: Omni, Cardioid, Figure-Eight and 7 Stages
- <200 ohm Impedance
- 25hz to 20khz Frequency Response
- -17db(A weight) Noise
- .5% Distortion @ 125db
- Class 'A' 6072a Tube Circuit
- BV8 Dual Bobbin Transformer Output
- Premium Robust Shock-Mount
- 7 Pin XLR Cable
- Included Power Supply
- Deluxe Protective Wooden Box
- Aluminium Road Case
